

2007-07-28 - Gates Installed on Rimrock Dr

City Park maintenance crews installed both the north and south gates on Rimrock Dr this last week. At both gates they developed a parking lot surrounded by rocks and covered in gravel.

This represents 15 years of volunteer work by our Palisades Neighborhood to attempt to keep this drive and the surrounding area clean of garbage that included everything you could imagine from kitchen left overs to dead animals, tires, TV's, baby diapers, couches and chairs and just about anything else you could think of that should have gone to the Waste to Energy Plant. Now park visitors can enjoy a quiet walk, bicycle or horseback ride along the Rimrock without vehicular noise. The animals residents of Palisades will also appreciate the quiet atmosphere.

This load of disgusting garbage was not only dumped, but flung over the Rimrock the day before the gates were locked. Let's hope that people will respect this Conservancy Area and appreciate it's natural beauty and not visually disturb it.

Please come to Palisades Park and enjoy a quiet Rimrock Drive.
